### **► INSTALLATION**

An accessible pipe chase is required for installation. Four anchor rods screw into sockets on back of the fixture. Anchor rods pass through the wall and are secured with washers and hex nuts on the chase side of the wall. The installer must provide wall openings for anchor rods and piping per rough-in drawings provided by Metcraft.

NOTE: A security frame (wall sleeve) is recommended when installed on a new block (CMU) or poured concrete wall. A security frame is not appropriate for hollow wall construction.
